

# DIAGNOSTIC IMAGING AND RADIOLOGY SERVICES

Children's National Hospital offers state-of-the-art imaging at multiple outpatient locations throughout Washington, D.C., and Maryland, including a brand-new facility in Prince George's County.

All imaging exams are supervised and interpreted by board-certified radiologists with advanced pediatric certifications.

When sedation is required, Children's National anesthesiologists and nurses are on-site to ensure the safest care. Our child-friendly environments include themed imaging suites, and staff is specially trained to help minimize stress and anxiety associated with medical procedures.
